

You'll Find a Solution for Every Application

Factory Vision™ marquees, andons and process control boards offer the perfect solution for your visual factory management needs.

The Factory Vision™ line is ideal for a wide range of lean manufacturing and material handling applications including:

Automotive Industry

Food & Beverage Industry

Petrochemical Industry

Pharmaceutical Industry

A Variety of Other Discrete or Process Manufacturing Industries

FACTORY VISION™
MacDonald Humphrey (Products) Ltd.

VISUAL FACTORY MANAGEMENT

Find your competitive edge with the Factory Vision™ line of marquees, andons and process control boards from Electro-Matic Products, Inc.

Lean manufacturing and visual factory management represent the next generation of manufacturing. These systems rely on real-time information and feedback regarding the status of the plant to achieve success. The Factory Vision™ line of marquees, andons, industrial clocks and counters, and process control boards provide the perfect answer to all your communication needs in the industrial environment. They open a window to factory performance and supply the foundation for a company-wide “nervous system”, ensuring all employees understand how they affect the factory’s overall performance.

Our Factory Vision™ line will serve all your visual factory management needs no matter what you manufacture. From the auto industry to the food and beverage industry to materials handling, Factory Vision™ can provide the tools to help you stay competitive in today’s manufacturing environment. Just speak to one of our helpful sales representatives for a demonstration of what our Factory Vision™ line can do for your company.

A Superior Product

Electro-Matic assembles and markets, under license with MacDonald Humfrey Products, Inc. the next generation of marquees, andons and process control boards—Factory Vision™. The Factory Vision™ line is an industry-recognized leader in supplying the needs of companies using lean manufacturing and visual factory management.

In our new Factory Vision™ line, we have continued our over 20 years of innovative, experienced-based product development in the industrial market. The Factory Vision™ family of full matrix

marquees and process control boards gives you unprecedented flexibility.

This family of robust industrial displays has been developed to meet the needs of a variety of manufacturing applications. Factory Vision™ displays meet or exceed the needs of any visual factory management system. From one line marquees to twenty one line process control boards, our Factory Vision™ line allows you to expand into larger applications without reinvesting in training or new software systems.

Standard Features
