# ACCU-SORT AXIOM™

Laser Bar Code Scanner Family

## Features and Benefits

(both linear and omnidirectional versions available)

**eData Solutions**, a unit of Cross Automation, is proud to represent the AXIOM™ line of Accu-Sort laser bar code scanners with standard EtherNet/IP. The AXIOM is an extremely flexible scanner designed to meet all of your industrial bar code scanning needs. It comes in 3 versions: 1 laser, 2 lasers or 4 lasers.

FEATURE	BENEFIT
Flexible Connectivity	The AXIOM interfaces seamlessly into your facility saving additional costs for external interface converters. Ethernet TCP/IP, EtherNet/IP, RS-232, and RS-422 are all standard on every AXIOM. Four user-configurable I/O ports are also standard.
Modular Scan Head and Wiring Base	Simplifies installation and minimizes down-time. Connect directly to the wiring base quickly and easily then snap on the scan head. Should any problems arise, both the scan head and wiring base are "hot-swappable" for quick replacement and recovery.
All connections made through the Wiring Base	Simplifies mounting and installation allowing for quick replacement. All connections are made to the AXIOM via terminal blocks located in the wiring base. No soldering is required. The four user configurable I/O ports are set by the customer to meet their needs using Accu-Sort's AXCESS™ setup software.
AXCESS™ Software	Enables the customer to set up the AXIOM without the need for an on-site service call saving time and money.  Accu-Sort's AXCESS setup software is full-featured and powerful enough for the seasoned technician, yet straightforward and intuitive for the casual user. AXCESS is the window into the AXIOM's operations, offering setup, monitoring, software downloads, and diagnostic capabilities.
